

The Great Base Theme

Step by step

Your .MD File Basics

The First Steps

Front-Matter Syntax

- Always the first thing in the .md file
 - Between dash rulers

```
---
marp: true
theme: basetheme
paginate: true
footer: Replace this with your desired footer text
header: '![lupo](media/logo-dark.png)'
---
```

Directives

Local Directives

- Applies to:
 - The current slide
 - And following slides
- Written as comments

```
<!-- _class: slide-header-halfleft-halfright  
_backgroundColor: teal-->
```

This page has a blue background.

```
---
```

The second page also has same color.

Directives

Local Directives

- Applies to:
 - The current slide
 - And following slides
- Written as comments

```
<!-- backgroundColor: #23B3DB -->
```

This page has a blue background.

```
---
```

The second page also has same color.

Spot Directives

- Applies to
 - **ONLY** the current slide
- Must be written as a comment but with an underscore

```
<!-- _backgroundColor: violet -->
```

Add underscore prefix `_` to the name of local directives.

```
---
```

The second page would not apply setting of directives.

Directives

| | |
|------------------------------|---|
| <code>paginate</code> | Show page number on the slide if you set true. |
| <code>header</code> | Specify the content of slide header. |
| <code>footer</code> | Specify the content of slide footer. |
| <code>class</code> | Specify HTML class of slide's <code><section></code> element. |
| <code>backgroundColor</code> | Setting background-color style of slide. |
| <code>backgroundImage</code> | Setting background-image style of slide. |

Directives

| | |
|-----------------|---|
| paginate | Show page number on the slide if you set true. |
| header | Specify the content of slide header. |
| footer | Specify the content of slide footer. |
| class | Specify HTML class of slide's <code><section></code> element. |
| backgroundColor | Setting background-color style of slide. |
| backgroundImage | Setting background-image style of slide. |

The Templates

AKA Class Local Directive

Premade Class Local Directives

Or your templates

```
<!-- _class: slide-test-colors -->  
<!-- _class: slide-cover -->  
<!-- _class: slide-onethirdleft-twothirdsright -->  
<!-- _class: slide-header-onethirdleft-twothirdsright -->  
<!-- _class: slide-header-halfleft-halfright -->  
<!-- _class: slide-definition -->  
<!-- _class: slide-header-content -->  
<!-- _class: slide-header-subheader-content -->  
<!-- _class: slide-image-rightnote -->  
<!-- _class: slide-image-centerednote -->  
<!-- _class: slide-thanks -->  
<!-- _class: slide-video -->  
<!-- _class: slide-demo -->
```

Premade Class Local Directives

Or your templates

```
<!-- _class: slide-header-subheader-content  
_footer: ""  
_header: ""  
_paginate: false  
_backgroundColor: cadetblue -->
```

Let's Make It Look Personalized

By adding your fonts and colors

Leave These Lines Alone!

```
@import 'default';

/* required for video, do not delete */
video {
  position: fixed;
  right: 0;
  bottom: 0;
  min-width: 100%;
  min-height: 100%;
}

img {
  background-color: transparent !important;
  object-fit: cover;
  display: flex;
  align-items: center;
  justify-content: center;
}
```

We make it easier for you

```
/* Replace with your font */
@import url('https://fonts.googleapis.com/
css2?family=Nunito:wght@300;400;500;700&fa
mily=Roboto+Mono:wght@300;400;500;700&famil
y=Roboto+Slab:wght@300;400;500;700&family=R
oboto:wght@300;400;500;700&display=swap');

/* Replace with your font and colors */
:root {
  --primary-font: 'Poppins', sans-serif;
  --secondary-font: 'Nunito', sans-serif;
  --code-font: 'Roboto Mono', monospace;

  --lightmode-background: #FFFFFF;
  --lightmode-text: #333333;
  --lightmode-accent: #CCCCCC;
  --darkmode--background: #333333;
  --darkmode--text: #CCCCCC;
  --darkmode--accent: #666666;
}
```

1. Add your font:
 - i. Replace the `@import url` link
 - ii. Or use the `@font-face` rule
2. Replace:
 - i. Font names
 - a. Poppins, Nunito, and Roboto Mono
 - ii. HEX code of colors
 - a. #FFFFFF, #333333, #CCCCCC, #333333, #CCCCCC, and #666666
3. Save the CSS file.
4. Fonts and colors should be updated

This Slide Will Help you test colors

```
<!-- _class: slide-test-colors -->
```

LOGO

main text

main accent

LOGO

dark text color

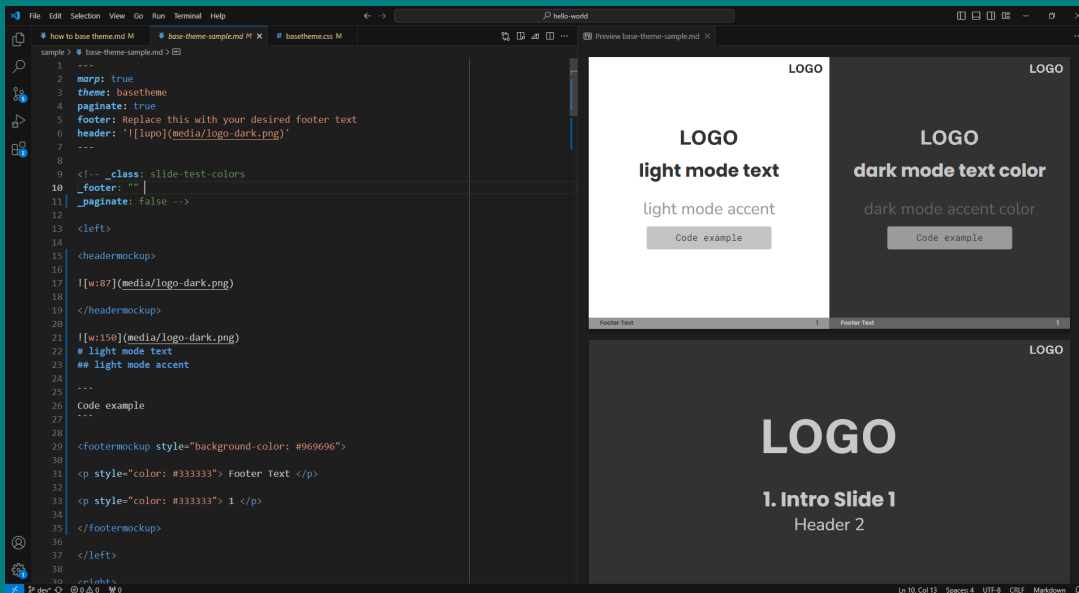

dark accent color

Base Theme Templates

Two Ways to Use Them

1. Copy and Paste

base-theme-sample.md

1. Open the `base-theme-sample.md` file
2. Look for the template you want to use and copy it
3. Open the `.md` file you are working on and paste
4. Replace with your text

- Pros:
 - You can visually see what you will get
 - Have an example of contents
- Cons:
 - If the file is modified you loose the accurate preview

2. Snippets

IMAGE PENDING

1. Type `slide-`
 2. Press Enter or Tab
 3. Select the slide you want to use from the list
 4. And start replacing the prompted text with what you want to show
- Pros:
 - The original templates are not easy to modify
 - You will be prompted one by one which element to fill out
 - Cons:
 - You need at least an idea of the name of the template you want to use

What if things don't fit
You can make extra adjustments

.MD Accepts html

If you write this:

This text is very important and I need to make it more striking

You will get this:

This text is very important and I need to make it more striking

If you write this:

```
<p style="font-size: 40px; color: red; font-weight: bold; text-transform: uppercase;"> This text is very important and I need to make it more striking </p>
```

You will get this:

**THIS TEXT IS VERY IMPORTANT
AND I NEED TO MAKE IT MORE
STRIKING**

**Or modify the
css**

IMAGE PENDING
